

The pdf files can be viewed using the free Adobe® Reader® or Adobe® Acrobat®. The USB device has an AutoRun feature that will start once it is activated on a Windows-based computer. Insert the USB device in a computer running Windows (XP, Vista or 7) and click "Open folder to view files", then double-click the "AutoRun" application. A startup screen page will be displayed with Headings linked to pdf files. Place the mouse over any Heading and click to activate, and a new window will open. The Technical Papers Heading contains a listing of all papers that are linked to their appropriate files.

For Macintosh-based computers, insert the USB device and with Finder open the "Documents" folder. Using either the free Adobe® Reader® or Adobe® Acrobat® open the ICARD Startup Screen.pdf file. A startup screen page will be displayed with Headings linked to pdf files. Place the mouse over any Heading and click to activate, and a new window will open. The Technical Papers Heading contains a listing of all papers that are linked to their appropriate files.
