

TECHNICAL PAPERS

Proceedings of the 9th International Conference on Acid Rock Drainage

Edited by W.A. Price, C. Hogan and G. Tremblay

May 20-26, 2012 Ottawa, Ontario, Canada

Climate Change

Climate Change Impacts on Metal Leaching and Acid Rock Drainage at Canadian Mines – Risks for Operation and Closure
Stefan Reinecke and John Brodie

Analyzing the Effect of Climate Change on Soil Cover Performance
Jason Stianson, Ashley Dubnick, Cameron McNaughton and Delwyn Fredlund

Acid Rock Drainage and Climate Change: What's Next?
R. David Williams

Drainage Collection and Treatment – General

In-Pulp Treatment of Dissolved Arsenic from a Gold Mine
Bernard Aubé and Lucienne Anctil

Tracer Testing of Settling Ponds at Xstrata Copper Canada, Kidd Mine Site
Bernard Aubé, Stephanie Thibeault and Janice Zinck

Sulphide Precipitation and Ion Exchange Technologies to Treat Acid Mine Drainage
Max Nodwell and David Kratochvil

Development of Low Cost ARD Neutralisation Strategies for the Savage River Rehabilitation Project
Daniel J. Ray, Gary Hickman, Sophie Le Roux, Alison Hughes and Jim Stefanoff

Alkaline Treatment of ARD – Carbonate and Hydroxide Alkalinities in Sequence
Lotta Sartz, Erik Larsson and Mattias Bäckström

Gold Mine Arsenic and Antimony Removed Through Passive Treatment Using AMD Iron Oxides From Coal Mines
D. Trumm, R. Rait, J. Pope, D. Crac and N. Newman

The Effects of Aluminum, Iron, Manganese and Hydrogen Peroxide on Thallium Removal
Katherine Vatterrodt, Morgan Davies, Linda Figueroa, Thomas Wildeman and Charles Bucknam

Parys in Springtime: Hazard Management and Steps Towards
Remediation of the UK's Most Polluted Acidic Mine Discharge
Paul L. Younger and Hugh A.B. Potter

Drainage Collection and Treatment – Bioreactors

Acid Drainage: Microbes Present and Potential for Source Treatments
D. Jack Adams

The Genetic Diversity of Microbes in a Biochemical Reactor Treating Metal-rich
Landfill Leachate: What This Tells Us About Treatment Mechanisms
Susan A. Baldwin, Maryam Resadehbashi, Marcus Taupp, Al Mattes and
Steven J. Hallam

Passive Treatment of Coal-mine Drainage by a Sulfate-reducing Bioreactor:
A Case Study from the Illinois Coal Basin, USA
Paul T. Behum, Liliana Lefticariu, Kelly S. Bender, Larry Lewis, Yosief T. Segid,
Andrew S. Burns and Charles W. Pugh

Environmental Behaviour of Sulphate-Reducing Passive Bioreactor Mixture
T. Genty, C.M. Neculita, B. Bussière and G.J. Zagury

Merging Prevention and Treatment of Acid Mine Drainage through the Use of an
Organic Cover: The East-Sullivan Mine Site, Québec, Canada
Diane Germain, Normand Tassé, Johanne Cyr and Jean Dionne

Effect of Lactate/Acetate and Glucose Amendments on Low Temperature
Performance of Anaerobic Bioreactors Treating Simulated Mine Drainage
W. Douglas Gould, Rory Cameron, Lucie Morin, P. Bédard and Lyne Lortie

An Innovative, Long Term Dry Cover Treatment System to Manage Tailings
Management Area Percolate
James Higgins, Al Mattes and Sheldon Smith

Attenuation of Metals from the No Cash 500 Mine Adit Discharge in a Natural,
Cold Climate, Peat Wetland Part 2 – Hydrological and Geochemical Mechanisms
Brent Johnson, L.E. Eary, Barbara Sherrieff, James Harrington and Scott Davidson

Screening for Arsenate and Arsenite Resistant Microbes In Passive Treatment
Systems for Metal Leachate Remediation
Maryam Khoshnoodi, Marcus Taupp, Keith Mewis, Steven Hallam and
Susan Baldwin

Microbial Communities Associated with Passive Treatment of Sulphate and Selenium Containing Water

Parissa Mirjafari, Maryam Rezadehbashi and Susan A. Baldwin

Bioreactor for Passive Treatment of ARD at Tulsequah Chief

Andre Sobolewski, Robert Marsland and Terry Chandler

Passive Treatment Systems for Selenium Removal

Robert C. Thomas and James S. Bays

Drainage Collection and Treatment – Collection

Water Quality Modelling of the Tailings Disposal Facility at Nyrstar Myra Falls

Rina Freed, Rob Marsland, Jean Cho, Ivor McWilliams and Sharlene Henderson

Surface Water Treatment Plant for Mn, Ni and Cu at Morro da Mina, Brazil

Flavio de M. Vasconcelos, John W. Woodhull, Chris C. Gimber and
Gustavo L. Fontes

Reclamation Performance: Reviewing the Effectiveness of an Adit Plug at the Tom Property, Yukon

Kai Woloshyn and Stephen West

Drainage Collection and Treatment – Lime

Evaluation of Converting the Argo Tunnel ARD Treatment Plant to High Density Sludge

Gary T. Hickman, James G. Stefanoff, Michael F. Winter and Mary A. Boardman

Management of Acid Rock Drainage at Britannia Mine, BC

Part 2: Water Treatment Plant Implementation and Operations

Christian Madsen, Gerry O'Hara and Geoff Sinnett

Management of Acid Rock Drainage at Britannia Mine, BC

Part 1: Context and Technical Studies

Gerry O'Hara, Christian Madsen and Geoff Sinnett

Drainage Collection and Treatment – Sludge

Advances in the Production of Marketable Products from Mine Water Treatment Systems

Robert S. Hedin

Characterization of ARD Neutralization Sludges: Effect of ARD Influent Chemistry on Sludge Composition

Alan J. Martin, Diana Loomer, Skya Fawcett, Andrew Rollo and Tom Al

Treatment of Acidic Drainage Streams Using Membrane Separation

Saviz Mortazavi and John Chaulk

Evaluation of Sludge Management Options

J. Zinck and W. Griffith

Dry Covers

Whistle Mine Backfilled Pit Dry Cover Case Study – Performance Based on Six Years of Field Monitoring

B.K. Ayres, L. Lanteigne, M. O’Kane and G. Meiers

Consideration of Snow Melt and Physical Aspect in Simulating Cover Performance

Amy L. Hudson, Marybeth Dowell and Pete Kowalewski

Evaluation of Pore Water Chemistry to Simulate Dry Covers for the Remediation of Arsenic-bearing Gold Mine Tailings using Laboratory Columns

Jennifer L. Kavalench and Heather E. Jamieson

Evaluation of Alternative Cover Systems in High Precipitation Environments Using Unsaturated Flow Modeling

Jason Keller, Mike Milczarek, Monisha Banerjee, Raul Orellana, William Ludwick and Guosheng Zhan

Enhancing the Understanding for the Influence of Vegetation on Cover System Performance in a Canadian Mining Context

Sébastien Lamoureux, Justin Straker, Lee Barbour and Mike O’Kane

Investigation of Alkaline Cover Performance for Abatement of ARD from Waste Rock Dumps at Savage River Mine

J. Li, N. Kawashima, K. Kaplun, R. Schumann, R. St.C. Smart, A. Hughes, B. Hutchison and S. Kent

Normétal Mine Tailings Storage Facility HDPE Cover: Design Considerations and Performance Monitoring

R. Maurice

Field Performance Monitoring of a Cover System with Geosynthetic Layers, Case Study – Franklin Waste Rock Pile, Sydney NS

G.P. Meiers, M. O’Kane and D. Mayich

Development of a Technical Guidance Document for Cover System Design in Cold Regions

Mike Nahir, Mike O'Kane and Brian Ayres

Dry Covers on Historical Sulphidic Mine Waste – Long Term Statistic Performance Assessment of Surface Water Quality

A. Pourjabbar, S. Karlsson and B. Allard

Soil-Plant-Atmosphere Numerical Modelling of a Cover System in North-western Australia Utilizing the Moisture Store-and-Release Concept – Simulation of Seven Years of Field Performance Monitoring

R. Shurniak and M. O'Kane

Evaluation of the Function of the Dry Cover System at WRD5 at the Boliden Aitik Copper Mine, Northern Sweden

Åsa Sjöblom, Dave Christensen, Seth Mueller and Tami Taylor

Assessment of Plants with Allelopathy Potential as a Bio-barrier against Undesirable Bio-intrusion on Covers with Capillary Barrier Effects

Evgeniya Smirnova, Yves Bergeron, Francine Tremblay, Nelson Thiffault, Bruno Bussière and Gilles Joannis

Mitigation

Eliminating Acid Rock Drainage (ARD) at Mine Doyon – Sustained Operations Allow for New Possibilities

Annie Blier, Isabelle Demers, Mario Gagnon and Guylaine Bois

Long Term Risk of Releasing Potentially Acid Producing Waste Due to Tailings Dam Failure

David M. Chambers

Acid Mine Drainage Source Control Program Design Investigation
Upper Tenmile Creek Mining Area Superfund Site, Rimini, Montana
Angela Frandsen and Curt Coover

Early and Prolonged Limitation of AMD Production via Waste Landform Construction

Andrew Garvie, Stuart Miller, Pieter Fransen, Trevor Matuschka, Jeff Ruddock and Rory Haymont

Engineered Pumpable pHoam™. A New Innovative Method for Mitigating ARD
James Gusek, Brian Masloff and John Fodor

Samatosum - A Tale of Two Early Acid Drainage Prevention Approaches
Andrew Holmes, Brent Hamblin, James Hogarth, Craig Ford and Tracy Anderson

Phosphate Mining Waste Reduces Microbial Oxidation of Sulphidic Minerals: A Proposed Mechanism
M. Kalin, W.N. Wheeler, Carlos Paulo, M. Sudbury and Roger Smart

Long-term Biogeochemistry of Mine Tailings Amended with Organic Carbon for Water-quality Management
Matthew B.J. Lindsay, David W. Blowes, Peter D. Condon and Carol J. Ptacek

Innovative Closure Concepts for Xstrata's Operations at Onaping, Ontario, Canada
Jeff Martin and Joe Fyfe

Integrated Acid Rock Drainage Management at the Phu Kham Copper Gold Operation in Lao PDR
Stuart Miller, Tim Rowles, Jeff Millgate, John Pellicer, Luke Morris and Jon Gaunt

Geochemical and Hydrogeological Considerations from Backfilling of Discard and Ash
Koovila Naicker, Terry Harck and Nico Bezuidenhout

Sustainability Assessment of the Results of the WISMUT Environmental Remediation Programme (1990-2011)
Michael Paul, Stefan Mann and Thomas Metschies

Sullivan Mine Fatalities Technical Investigation and Subsequent Risk Management Monitoring
Mark Phillip, Daryl Hockley, Bruce Donald, Walter Kuit and Mike O'Kane

The Meadowbank Gold Mine – Reclamation Planning in an Arctic Environment
Stéphane Robert and Valérie Bertrand

Ongoing Evaluation of Tailing Geochemistry: An Integral Component of Mine Closure Planning
Alan M. Robertson, N. Kawashima, Roger St.C. Smart and Russell Schumann

Applicability and Suitability of Different Alkaline By-Products in Historic Mine Sites Remediation
Lotta Sartz, Mattias Bäckström, Stefan Sädbom, Stefan Karlsson and Bert Allard

Impact of an Organic Carbon Source on the Leaching of Vanadium from LD-Slag
Viktor Sjöberg, Stefan Karlsson and Anna Grandin

Pre- and Post-Remediation Characterization of Acid-Generating Fluvial Tailings Material

Kathleen S. Smith, Katherine Walton-Day, Karin Olson Hoal, Rhonda L. Driscoll and Kevin Pietersen

Post-Mining Agriculture for Biofuels on Mine Tailings: An Overview of Results from the Green Mines Green Energy (GMGE) Initiative

B. Tisch, J. Hargreaves, P. Beckett, A. Lock and G. Spiers

Rehabilitation Commitments for Pits and Waste Rock Stockpiles at Frances Creek Iron Ore Mine

David J. Williams, Peter A. Scott and Jamie Gerrard

Monitoring

Regulatory Water Quality Sampling and Aquatic Effects Monitoring at the Diavik Diamond Mine, Northwest Territories, Canada

Lianna Smith, Stephen Bourn and Gord Macdonald

A Reproductive and Trophic Transfer Study Associated With Selenium Concentrations in the Mud River Watershed

Mandee Wilson, Mindy Yeager Armstead and Paul Ziemkiewicz

National Programs

South African Mining-Related Water Research and Management – A National Priority

Joanna E. Burgess and Lani van Vuuren

Developments and Challenges in the Management of Mining Wastes and Waters in Europe

A.P. Jarvis, L. Alakangas, B. Azzie, L. Lindahl, J. Loredó, F. Madai, I.F. Walder and Ch. Wolkersdorfer

The U.S. Interior Department's Abandoned Mine Lands Program: A 15 Year Update

R. David Williams and Peter Bierbach

Pit Lakes

Predictive Pit Lake Modelling for Aitik Mine, Northern Sweden
C.J.D. Fraser, A.J. Martin, D. Dunbar, J. Bourne, Å.M. Sjöblom, G.D. Joslin and P. Lindström

The INAP Pit Lakes Database: A Novel Tool for the Evaluation of Predicted Pit Lake Water Quality
Emmon P. Johnson and Devin N. Castendyk

Distribution of Rare Earth Elements and Other Metals in a Stratified Acidic Pit Lake in Black Shales 45 Years after Mine Closure
S. Karlsson, V. Sjöberg, A. Pourjabbar, A. Grandin and B. Allard

Characterization of an Existing Pit Lake as an *in situ* Model for Closure Planning for the Detour Gold Mine
Patrick Mueller, Alan Martin, Jim Robertson, David Flather, Colin Fraser and Mark Bednarz

Physical Processes and Meromixis in Pit Lakes
Roger Pieters and Greg Lawrence

Hydrogeologic and Geochemical Prediction of Rosemont Pit Lake Using Three Different Modeling Programs
Gaius (Guy) Roemer, Michael Gabora, Amy L. Hudson and Mark Williamson

An Automated Method for Assessment of Pit Lake Water Quality Risk Using the Pit Quality Risk Assessment Protocol (PQRAP)
Pierre D.S. Rousseau, Rosalind Green, Brent Usher and Christopher Strachotta

Evaluation of Water Quality Changes for Mine Waste Disposal in Pit Lake, Former EL Mine Site Manitoba, Canada
Nikolay Sidenko, Karen Mathers, Caius Priscu and Steve Sibbick

Prediction of Drainage Chemistry – Analyses and Tests

Waste Rock Kinetic Testing Program: Assessment of the Scale Up Factor for Sulphate and Metal Release Rates
Judy Andrina, G. Ward Wilson and Stuart D. Miller

Application of an Advanced Mineralogical Technique: Sulphide Mineral Availability and Humidity Cell Interpretations based on MLA Analysis
Lisa Barazzuol and Kelly Sexsmith

Evaluation of Neutral pH Chemical Leaching Properties of Waste Rock at the Meliadine Gold Project

V. Bertrand, J. Cole and J. Noël

Modification and Automation of the Humidity Cell Test Protocol to Favor Tailings Reactivity

Hassan Bouzahzah, Mostafa Benzaazoua and Bruno Bussière

Oxic and Anoxic Tailings Slurry Aging Studies for Environmental Assessment of a Proposed Mining and Processing Development with Emphasis on Cyanide Species

Charles Bucknam and Daniel Snyder

Automated Mineralogy of Mine Tailings using Mineral Liberation Analysis

M. Buckwalter-Davis, H. Haggard and H. Jamieson

A Testing Approach to Assess the Weathering Behaviour of Lithotypes Characterised by a Trace-Sulphide/Carbonate-Deficient Mineralogy: Application to Altered Andesites/Diorites at the Boddington Gold Mine, Western Australia

G. Campbell, R. Haymont and N. Amoah

Predicting Metal Leaching from Selected Uranium Mine Mineralized Waste Rock Piles Samples

Mackenzie J. Denyes and Richard R. Goulet

Assessment of the Performance of Environmental Desulphurization on Arsenic Release from Tailings

Virginie Derycke, Mostafa Benzaazoua, Bruno Bussière, Mukendi Kongolo and Raphaël Mermillod-Blondin

Evaluating the Oxygen Reaction Rate Coefficient of Sulphidic Tailings using Laboratory and Field Tests

Mathieu Gosselin, Mamert Mbonimpa, Thomas Pabst and Michel Aubertin

Waste Rock Sulfate Release Rates at a Former Taconite Mine, Laboratory and Field-Scale Studies

Braden Hanna and Kim Lapakko

Validation of a European Standard for the Determination of Acid Potential and Neutralization Potential of Sulphidic Waste

Tommi Kaartinen and Margareta Wahlström

Leaching of Sulfidic Alum Shale Waste at Different Temperatures

Lovisa Karlsson, Mattias Bäckström and Bert Allard

A Review of Scale Factors for Estimating Waste Rock Weathering from
Laboratory Tests
Houston Kempton

Sericite and Chlorite Dissolution Rates from Humidity Cell Testing of Greenstone
Rock
Kim Lapakko

Acid Generation from Alunite and Jarosite Bearing Materials
Claire M. Linklater, John Chapman, Paul L. Brown, Rosalind Green and
Lisa Terrusi

Leaching Tests to Characterize Ferrous and Non-ferrous Slag Drainage
Chemistry
Nadine M. Piatak and Robert R. Seal II

Use of Exploration, Laboratory and Site-Specific Data for the Purpose of Mine
Rock Classification, NICO Gold-Cobalt-Bismuth-Copper Project, Northwest
Territories, Canada
Kristin Salzsauler, Ken DeVos and Rick Schryer

An Empirical Comparison of Humidity Cell and Field Barrel Data to Inform Scale-
Up Factors for Water Quality Predictions
Shannon Shaw and Andrea Samuels

GEOTEST[®]: Development of Field Geochemical Cells for On-site Acid Mine
Drainage Monitoring
M. Carolina Soto, Natalia Farfán, Patricio Galaz and Lissette Flores

Standard and Adapted Laboratory Test for Acid Drainage Prediction in Arid
Zones
M. Carolina Soto, May-Lin Almendras and Juan Ramón Candia

Use of Calcite-bearing Volcanic Rocks to Neutralize Sulfide Mine-waste
Drainage: Results from Static Reaction Vessel Experiments
Mark R. Stanton and Douglas B. Yager

Investigation of the Humidity Cell Testing Procedure for Prediction of Acid Rock
Drainage
Surya P. Sunkavalli and Edward M Trujillo

Predicting ML/ARD from Low Sulphide and Low Neutralization Potential Waste
Rock; Baffinland Iron Mines Mary River Project, Nunavut, Canada
S. Walker, J. Millard, J. Andrina and S. Sibbick

Geochemical Characterization with High Ionic Strength Methods for Arid-Climate Mines Utilizing Seawater
Jacob Waples, Christian Wisskirchen and Felipe Vásquez

Prediction of Drainage Chemistry – Antamina

The Influence of Spatial Heterogeneity and Material Characteristics on Fluid Flow Patterns Through Two Unsaturated, Mixed Waste-rock Piles
Sharon Blackmore, Brad Speidel, Andrew Critchley, Roger D. Beckie, K. Ulrich Mayer and Leslie Smith

Quantitative Mineralogy to Assess Waste Rock Weathering at the Antamina Mine
Randy Blaskovich, Bern Klein, Stephane Brienne, Roger D. Beckie, K. Ulrich Mayer, Celedonio A. Aranda and Charlene Haupt

Waste Rock Management at the Antamina Mine: Overall Strategy and Data Application in the Face of Continued Expansion
Bevin Harrison, Celedonio Aranda, Michael Sanchez and Janeth Vizconde

Mineralogical Characterization of Sulfidic Waste Rock at the Antamina Mine
Charlene D. Haupt, Louis Kabwe and Bern Klein

Stacked Field Cells as a Means for Studying Metal Attenuation by Waste Rock Mixing at the Antamina Mine in Peru
D. Trevor Hirsche, Roger D. Beckie, Michael Conlan, Sharon R. Blackmore, Leslie Smith, Bernhard Klein, K. Ulrich Mayer, Celedonio Aranda, Luis A. Rojas Bardón and Raúl Jamanca Castañeda

Evaluating Preferential Flow in an Experimental Waste Rock Pile using Unsaturated Flow and Solute Transport Modeling
M. Javadi, H.E. Peterson, S.R. Blackmore, K.U. Mayer, R.D. Beckie and L. Smith

Rapid Seasonal Transition from Neutral to Acidic Drainage in a Waste Rock Test Pile at the Antamina Mine, Peru
Holly Peterson, Roger Beckie, Bevin Harrison, K. Ulrich Mayer and Leslie Smith

Spatial and Temporal Variations of O₂ and CO₂ Pore Gas Concentrations in an Experimental Waste Rock Pile at the Antamina Mine, Peru
O. Singurindy, M.E. Lorca, H.E. Peterson, T. Hirsche, M. Javadi, S.R. Blackmore, C. Aranda, K.U. Mayer, R.D. Beckie and L. Smith

Prediction of Drainage Chemistry – Diavik

Diavik Waste Rock Project: Wind-Induced Gas Transport

Richard T. Amos, Xiaotong Chi, Marek Stastna, David W. Blowes, David C. Sego and Leslie Smith

Diavik Waste Rock Project: Geochemistry of Low Sulfide Content Large-scale Waste-rock Test Piles

Brenda L. Bailey, David W. Blowes, Leslie Smith and David C. Sego

Diavik Waste Rock Project: Microbiological Succession in Waste-rock Testpiles

Brenda L. Bailey, David W. Blowes, W. Douglas Gould, Leslie Smith and David C. Sego

Diavik Waste Rock Project: Preliminary Estimates of Multi-Year Net Infiltration

Nathan Fretz, Leslie Smith, David Blowes and Dave Sego

Diavik Waste Rock Project: Mineralogical Investigation of Sulfide Mineral

Weathering Products in Low-sulfide Waste Rock from an Operational Stockpile in the Arctic

Stacey Hannam, Matthew B.J. Lindsay, Blair Gibson, Dogan Paktunc,

David W. Blowes, Leslie Smith and David C. Sego

Processed Kimberlite Porewater Geochemistry from Diavik Diamond Mines, Inc.

Michael C. Moncur and Lianna J.D. Smith

Heat Transport and the Effects of Climate Change in a Large-scale Waste Rock Pile Located in a Continuous Permafrost Region at Diavik Diamond Mine

Nam Pham, David C. Sego, David W. Blowes, Leslie Smith and Richard T. Amos

Diavik Waste Rock Project: Objectives, Construction, Current Conclusions and Implications

Lianna J. Smith, Gord Macdonald, David W. Blowes, Leslie Smith, David C. Sego and Richard T. Amos

Diavik Waste Rock Project: Laboratory Studies

Ashley L. Stanton, David W. Blowes, Mandy Moore, Carol J. Ptacek,

David C. Sego, Leslie Smith and Richard T. Amos

Prediction of Drainage Chemistry – Field Studies

Suggestion for a Protocol for Detailed Investigation of Historical Mine Sites

Mattias Bäckström and Stefan Sädbom

Predicting Copper Concentrations in ACID Mine Drainage: A Comparative Analysis of Five Machine Learning Techniques
Getnet D. Betrie, Solomon Tesfamariam, Kevin A. Morin and Rehan Sadiq

Acid Rock Drainage Evaluation of Construction Aggregate Materials: Assessment of Petrographic Contribution
Anett G. Briggs and Fred H. Shrimmer

Arsenic Speciation in Mine Tailings and Co-existing Pore Water, Lower Seal Harbour Gold District, Nova Scotia, Canada
Catherine Daniels, Michael Parsons, Heather Jamieson and Gwendy Hall

Early Indicators of Acid Seepage Generation – a Comparative Study of Long-term Seepage Quality from Two Waste Rock Dumps in the Central Rocky Mountains
John W. Dockrey and Justin S. Stockwell

Current Water Quality Conditions at the Historic Rum Jungle Mine Site, Northern Australia
Paul R. Ferguson, Christoph Wels and Mike Fawcett

Integration of Hydrogeological, Geophysical and Geochemical Methods for the Delineation of Natural Sources of Uranium in Groundwater
M.R. Gunsinger, G.R. Boonstra, D.F. Laporte and K.J. DeVos

Metal Leaching in a Neutral pH Environment: EKATI Diamond Mine, NT, Canada
Kirsty Y. Ketchum, Stephen J. Day, Claudine A. Lee and Keith J. McLean

Evolution of Water Quality in the Goathill North Rock Pile at the Questa Mine and the Impacts on Under Drain Performance
Paul J. Kos and Mark J. Logsdon

Field Monitoring and Numerical Modeling of Gas Flow and Radon Emission Control in Waste Rock Dump 38neu, Germany
René Lefebvre, Belkacem Lahmira and Walfried Löbner

Investigations of Calcite Deposits in Streams Downstream of Coal Waste Rock Dumps, British Columbia and Alberta, Canada
Dylan MacGregor, Stephen Day and Gibran Lopez

Geologic Processes Affecting the Chemistry, Mineralogy, and Acid Potential on Particle Size Fractions: Examples from Waste Rock Piles in New Mexico, USA
Virginia T. McLemore

Case Studies of Thousands of Water Analyses through Decades of Monitoring:
Selected Observations from Three Minesites in British Columbia, Canada
Kevin A. Morin, Nora M. Hutt and Mike Aziz

Two and Three Decades Post-Closure: Revisiting the ARD Predictions and
Closure Plans for Two Copper Mines in British Columbia, Canada
Ronald V. Nicholson, Michael Venhuis, Erin Clyde, Jacques Moulins,
John Stroiazzo and Charles See

Arsenic Mobility from Mine Tailings
Dogan Paktunc

Estimating Water Quality Trends in Abandoned Coal Mine-pools
Eric F. Perry and Henry Rauch

Fingerprinting Acid Mine Drainage in Wet-dry Tropical Climates using Stable
Isotope Approach: An Example from Queensland, Australia
Phong H. Pham, Mansour Edraki, Barry Noller and Sue Golding

Extraction of ARD/ML Information from a Brownfield Site for Development of an
ARD/ML Plan at the Detour Gold Mine, Ontario, Canada
Jim Robertson

Physical and Geochemical Characteristics of Contaminants in an Abandoned
Metal-Impacted River Catchment under Varying Hydrological Conditions
Sian E. Rudall and Adam P. Jarvis

Estimation of Groundwater Residence Time in Tailings from the Elizabeth
Copper Mine Superfund Site, Vermont, USA
Robert R. Seal II, Andrew G. Hunt, L. Niel Plummer, Gerolamo C. Casile,
Nadine M. Piatak and Edward Hathaway

Thiosulphate-oxidizing Bacteria as Indicators of Sulphide Mineral Oxidation
A. Sobolewski

Aluminum Buffering of Mildly Acidic Waste Rock from a Hard Rock Open Pit
Mine in the Central Rocky Mountains
Justin S. Stockwell and John W. Dockrey

Mechanisms Triggering Metal Release from Floodplain Soils and Sediments,
Three Nations Creek, Ontario, Canada
C.J. Warren, D. Yaschyshyn, A. Stenzel, L. Fedat and J. Moulins

Copper Enrichment and Secondary Mineralogy in Porphyry Copper Tailings Deposited into a Marine Environment, Bay of Chañaral (Atacama Desert, N-Chile)

Christian Wisskirchen, Bernhard Dold and Jorge E. Spangenberg

Prediction of Drainage Chemistry – Modeling

Development of a Water Quality Model for Gold Tailings in Northern Quebec

Ian Collins, Ron Nicholson, Michael Venhuis and Lucienne Ancil

Mass-Balance Modelling as a Planning Tool for Water Quality Management at Mine Closure, Premier Gold Project (PGP), Boliden Limited

Michael D. Dabiri and Ylva Ward

Predictive Site-wide Water Quality Modeling as a Tool for Mine Planning and Permitting: A Recent Canadian Example

Alexander Fitzpatrick

A Practical Application of Mass-Balance Methods for Predicting Mine Drainage Water Quality – Climate Influences and Best Practices

Michael K. Herrell, Kristin Salzsauler and Che McRae

The Importance of Sensitivity Analysis in Predictive Geochemical Modeling of Mine Water

Cheryl S. Ross and Rens B. Verburg

Application of Predictive Geochemical Modeling to Optimize Closure Design for the Williams Mine

Steve Sibbick, Jennifer Kavalench and Shane Hayes

Prediction of Drainage Chemistry – Selenium

Interpretation of Selenium Release from Coal Mine Waste Rock Dumps, Southeastern British Columbia, Canada

Stephen Day, Chris Kennedy and John Pumphrey

Selenium Leaching from Coal Waste Rock in the Elk Valley, B.C.

Chris Kennedy, Stephen Day, Dylan MacGregor and John Pumphrey

Determination of Natural Attenuation of Selenium at a Coal-mining Complex in West Virginia

P.F. Ziemkiewicz and R.J. Lovett

Social Licensing

Stakeholder Involvement in Catchment and Mining Impact Management in Arid Zones of Peru, Bolivia and Chile: The Experience of the CAMINAR Project

Jaime M. Amezaga, Paul L. Younger, Tobias Roetting, Anthony-Jo Noles, Edwin Guzman, Percy Jimenez, Jorge Quintanilla, Jose Lorini, Carlos Pelaez, Ricardo Oyarzun, Guido Soto, Manuel Soto and Michelle Señoret

TSM in Action: The Mining Association of Canada's "Towards Sustainable Mining" Initiative

Ben Chalmers, Elizabeth Gardiner, Julie Gelfand and Tara Shea

Institutional Control of Mine Wastes in Saskatchewan, Canada

Keith Cunningham, Dale Kristoff, Don Hovdebo and Michael Webster

Earning a Social License to Operate in the Kivalliq Region of Nunavut

Graeme Dargo and Larry Connell

ARD – a Sustainable Development Issue

Anne-Marie Fleury and Mark Holmes
